About The Ability of the Foam Liquid Concentrates as Fire Fighting Materials Produced by International Security & Safety Systems Company (I.S.S) and their Conformity with the International American Standards UL162

=====

Carrying out the needed tests on both foam liquids (**AFFF**) and (**AR. AFFF**) with their different concentrations of 3% and 6% produced by the international security & safety systems company (**I.S.S**) where the test were carried out at the company site according to the international standards, where both foam liquids with their concentrates of 3 and 6% are in total conformity with the American international standard **UL 162**.

The efficiency of these foams as fire fight was found to be in excellent agreement considering the quantity, time of fire fighting referring to the used concentrations.
